Title: Revised proposal to add the Coptic alphabet to the BMP of the UCS
Source: NSAI/ICTSCC/SC4, Ireland
Status: Member Body Contribution
Action: For consideration by JTC1/SC2/WG2 and UTC
Date: 2003-10-01

This document requests additional characters to be added to the UCS and contains the proposal summary form. It replaces N2611, and gives additional information about the KHI RO symbol and about the DOUBLE HYPHEN.

A. Administrative**1. Title**

Revised proposal to add the Coptic alphabet to the BMP of the UCS.

2. Requester's name

Ireland

3. Requester type (Member body/Liaison/Individual contribution)

Member body contribution.

4. Submission date

2003-10-01

5. Requester's reference (if applicable)

NN2611 (2003-08024), N2444 (2002-05-08)

6. Choose one of the following:**6a. This is a complete proposal**

Yes.

6b. More information will be provided later

No.

B. Technical – General**1. Choose one of the following:****1a. This proposal is for a new script (set of characters)**

No, but it is a proposal for a new block of Coptic characters.

Proposed name of script

Coptic

1b. The proposal is for addition of character(s) to an existing block

Yes, one.

1b. Name of the existing block

General punctuation

2. Number of characters in proposal

60 (59 + 1)

3. Proposed category (see section II, Character Categories)

Category A

4a. Proposed Level of Implementation (1, 2 or 3) (see clause 14, ISO/IEC 10646-1: 2000)

Level 1.

4b. Is a rationale provided for the choice?

Yes.

4c. If YES, reference

Spacing characters are proposed.

5a. Is a repertoire including character names provided?

Yes.

5b. If YES, are the names in accordance with the character naming guidelines in Annex L of ISO/IEC 10646-1: 2000?

Yes.

5c. Are the character shapes attached in a legible form suitable for review?

Yes.

6a. Who will provide the appropriate computerized font (ordered preference: True Type, or PostScript format) for publishing the standard?

Michael Everson. TrueType.

6b. If available now, identify source(s) for the font (include address, e-mail, ftp-site, etc.) and indicate the tools used:

Michael Everson, Fontographer.

7a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?

Yes, see bibliography below.

7b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?

Yes.

8. Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?

Yes, see below.

9. Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see Unicode Character Database <http://www.unicode.org/Public/UNIDATA/UnicodeCharacterDatabase.html> and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

Yes, see Unicode properties below.

C. Technical – Justification

1. Has this proposal for addition of character(s) been submitted before? If YES, explain.

Yes. N1658, N2444. UTC has recently acknowledged the need to disunify Coptic from Greek.

2a. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?

Yes.

2b. If YES, with whom?

Stephen Emmel representing the International Association for Coptic Studies (IACS)

2c. If YES, available relevant documents

N2444

3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?

Scholarly, ecclesiastical, and library communities.

4a. The context of use for the proposed characters (type of use; common or rare)

Characters are used to write the Coptic language.

4b. Reference

See below.

5a. Are the proposed characters in current use by the user community?

Yes.

5b. If YES, where?

By scholars, ecclesiastical researchers, Coptic Christians, and librarians.

6a. After giving due considerations to the principles in Principles and Procedures document (a WG 2 standing document) must the proposed characters be entirely in the BMP?

Yes.

6b. If YES, is a rationale provided?

Yes.

6c. If YES, reference

Accordance with the Roadmap. Other Coptic characters are encoded in the Greek and Coptic block.

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?

Yes, they should be encoded in a single block as presented here.

8a. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?

Yes.

8b. If YES, is a rationale for its inclusion provided?

Yes.

8c. If YES, reference

Coptic characters are similar to, but not identical to, Greek characters, and Coptists need to distinguish the two in plain text.

9a. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?

No.

9b. If YES, is a rationale for its inclusion provided?

9c. If YES, reference

10a. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character?

Yes.

10b. If YES, is a rationale for its inclusion provided?

Yes.

10c. If YES, reference

The more generic U+2627 CHI RHO must be considered to be a logotype derived from two Greek letters; the KHI RO proposed here is derived from two Coptic letters, and is used in Coptic text.

11a. Does the proposal include use of combining characters and/or use of composite sequences (see clauses 4.12 and 4.14 in ISO/IEC 10646-1: 2000)?

Yes.

11b. If YES, is a rationale for such use provided?

Yes.

11c. If YES, reference

Combining diacritical marks.

12a. Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?

No.

12b. If YES, reference

13a. Does the proposal contain characters with any special properties such as control function or similar semantics?

No.

13b. If YES, describe in detail (include attachment if necessary)

14a. Does the proposal contain any Ideographic compatibility character(s)?

No.

14b. If YES, is the equivalent corresponding unified ideographic character(s) identified?

14c. If YES, reference

D. Proposal

On foot of the arguments given in N2444, the UTC and WG2 have decided to disunify the Coptic script from the Greek script. Currently the UCS encodes 7 Coptic letters (14 characters with the casing pairs); this proposal adds 26 letters (52 characters with the casing pairs), as well as several other characters needed for basic Coptic text processing, including standard logotypes used in Coptic text. It is recognized that there will be further additions required by scholars for special purposes, but the set here will allow basic Coptic text processing of, for instance, the Gospel of Thomas and other important Coptic texts. The set proposed here is the *core character set* for Coptic. (Additional characters include, at least, alphabetical characters representing the sounds in Old Nubian, namely /dʒ/, /ŋ/, /ɲ/, /w/. There are also additional script-specific symbols.)

Combining characters

A number of generic characters are used in Coptic. The diaeresis (U+ 0308 ˘) can be used over ı and ȶ in syllable-initial position; the apostrophe (U+2019 ') is used to indicate the end of phonological words and clitics; the circumflex (U+0302 ^) is used in post-seventh century texts on vowels which form independent syllables. According to Fossey 1948, the acute accent (U+0301 ´) can be used to indicate stress; likely this is a didactic use in modern editions.

A special combining mark called the *jinkim* is used in Coptic. The *jinkim* indicates the syllabic pronunciation of a character, that is, a consonant pronounced with a reduced vowel: so cŃ is pronounced

[s^ən]. Coptic scribes treated the *jinkim* differently: in Sahidic, it looks like a macron; in Akhmimic (sometimes Fayumic), it looks like a grave; in Bohairic, it looks like a dot above. At this time we accept the proposal to unify these with macron (U+ 0304 ¯), grave (U+ 0300 `), and dot above (U+ 0307 ¨). It may be the case that because of monofont issues with Greek varia or Latin macron that this may prove impractical, but at this time we are only proposing to add the core character set. We expect that the UTC and WG2 will look as favourably on an eventual disunification of the *jinkims* from the other combining accents as they have for the disunification of Coptic letters from Greek letters, if Coptacists find they have the same problems.

Punctuation

A number of punctuation characters are used in Coptic. Several of these are generic punctuation characters: FULL STOP, COLON, SEMICOLON (= GREEK QUESTION MARK) and MIDDLE DOT (= GREEK ANO TELEIA) are used, and in edited texts quotation marks are used. A COPTIC FULL STOP • can be used. In some didactic texts, hyphen is distinguished from a special oblique double hyphen ⷺ as can be seen in the samples below. This character has been observed in use in other scripts. We believe it should be encoded in the General Punctuation block. It forms a part of *this* proposal; we believe the evidence here is strong enough to encode it at U+2055, and we encourage UTC and WG2 not to wait for “another proposal”.

Numerals

Numerals are indicated with letters of the alphabet, as in Greek; sometimes COMBINING OVERLINE U+0305 is used with them. The GREEK LOWER NUMERAL SIGN U+0375 or the COMBINING DOUBLE OVERLINE U+033F can be used to indicate multiples of 1000, so α = 1, $\bar{\alpha}$, or $\overline{\bar{\alpha}}$ = 1000; $\alpha\overline{\omega\pi\eta}$ = 1888. The GREEK NUMERAL SIGN U+0374 is used for fractions, so σ' = $\frac{1}{3}$, though $\frac{1}{2}$ is indicated by the symbol s . See figure 11.

Abbreviations

The COMBINING OVERLINE U+0305 is also used to indicate abbreviations: πνα for πνευα.

Additional symbols

In dates, the Diocletian era is indicated with a **ප** *mi ro* or **ຂ** *khi ro* (either originally derived from the Greek χρόνος μαρτύρων ‘time of martyrs’). These are conventional symbols which cannot be algorithmically decomposed. The latter must not be unified with U+2627 CHI RHO because the CHI RHO is a ligature of Greek CHI and Greek RHO, and these have been disunified from Coptic KHI and Coptic RO. Therefore it is only logical (as well as necessary for the stated monofont requirement for Greek and Coptic), for the Coptic KHI RO to be likewise disunified. See figures 15 and 16 below for more information. Note the use of **ප** RO WITH STROKE as a standard abbreviation: **cpoc** = **ctaƿpoc** ‘cross’; it is not a ligature of ***taƿp.**, though it is probably an original ligature of the two letters *tau ro*.

Character names.

Transliterated character names taken from Coptic dialects as given in Crum are used for the Coptic letters. A chart showing these and other variants is given below. Note that we have specified five columns for Coptic. It is known that there will be more than five *non-core* additions to this script which await further study.

ܶ z	ܶ ks, x	ܰ kh, ch	ܲ č, tsch
ܵ ē, ê	ܵ ö	ܲ ps	ܲ c, kj
ܶ th	ܰ p	ܱ ô, ô	ܲ ti

Die Namen der Buchstaben sind nur bohairisch in moderner Form erhalten und lauten nach WORRELL (UM 314ff.) folgendermaßen²: ՚ alfa, ՚ beda oder veda, ՚ gamma, ՚ dalda, ՚ eje, ՚ zada, ՚ hâda, ՚ tútte, ՚ jôda, ՚ kabba, ՚ lôla, ՚ mëj, ՚ ni, ՚ eksi, ՚ ôw, ՚ bej, ՚ rôw, ՚ sámma, ՚ daû, ՚ he, ՚ fîj, ՚ kij, ՚ ébsi, ՚ ôs, ՚ schaj, ՚ faj, ՚ chaj, ՚ hôri, ՚ dschandscha, ՚ schîma, ՚ dîj, ՚ dî.

Figure 2. The Coptic alphabet, from Till 1966.

KOPTISCH

Name	Zeichen	Umschrift und Lautwert	Allgemeines.
Alfa	Α α	a	Das Koptische ist die in christlicher Zeit (seit dem 3. Jahrhundert) gesprochene und mit griechischen Buchstaben geschriebene Sprache der Ägypter. Seit dem 16. Jahrhundert ist es vom Vulgäararabischen verdrängt und lebt heute nur noch im bohairischen Dialekt als Kirchensprache fort (ähnlich dem Latein der katholischen Kirche). Der Name dieses letzten Ausläufers der vorher mit Hieroglyphen (siehe Taf. 6) geschriebenen altägyptischen Sprache geht auf arabisch قبط = Qibṭ zurück. Die koptische Sprache, deren Literatur überwiegend biblisch und kirchlich ist, liegt uns in mehreren Dialekten vor, den oberägyptischen des Sahidischen, Achmimischen, Fayumischen, Memphitischen und dem unterägyptischen des Bohairischen (vgl. die unten mitgeteilte Textprobe).
Vida	Β β	b [b, v]	
Gamma	Γ γ	g	
Dalda	Δ δ	d	
Ei	Ε ε	e [ē]	
Sīta	Σ Σ	z	
Hīda	Η Η	ē	
Tīda	Θ Θ	th [t+h]	Das Alphabet besteht aus 31 Buchstaben, die von links nach rechts geschrieben werden wie die griechischen, die den Grundbestand des Alphabets bilden. Die letzten 7 Buchstaben sind der demotischen Schrift entnommen, und zwar liegt zugrunde dem
Jōda	Ι Ι	i [i, j]	ῑ demot. ψ (ψ); ε̄ demot. γ (γ);
Kappa	Κ Κ	k	σ̄ demot. λ (λ); ζ̄ demot. ζ (ζ);
Lōla	Λ Λ	l	ς̄ demot. λ̄ (λ̄); σ̄ dem. σ̄ (σ̄); τ̄ dem. τ̄ (τ̄).
Mi	Μ Μ	m	
Ni	Ν Ν	n	
Exi	Ξ Ξ	x [ks]	Das letzte Zeichen τ̄ ist also keine Ligatur aus τ mit aufgesetztem ῑ; es drückt den Doppelaut ξ̄ aus. Der Buchstabe ζ̄ kommt nur im Bohairischen vor; ihm entspricht im Achmimischen ζ̄ (aus ζ mit diakritischem Strich).
O	Ο Ο	o [ȫ]	
Bi	Π Π	p	Außer den vollen Vokalen und Diphthongen (die im Gegensatz zu den Hieroglyphen mit Hilfe der griechischen Buchstaben geschrieben werden) kennt das Koptische noch einen unbestimmten „Murmelvokal“ ε̄, den man im Sahidischen mit einem über den Konsonanten gesetzten – bezeichnet (im Bohairischen mit ε̄, im Fayumischen mit ε̄ [vgl. Textproben]): π̄ ε̄; η̄ ε̄.
Ro	Ρ Ρ	r	Die Zahlen, die im Sahidischen meist ausgeschrieben werden, bezeichnen das Bohairische mit den griechischen Buchstabenziffern (darunter ε̄ = 6; ρ̄ = 900).
Sīma	Ϲ Ϲ	s	
Dau	Τ Τ	t	Abkürzungen. Für eine Anzahl häufiger griechischer Wörter (an denen die koptischen Texte reich sind) treten Abkürzungen ein: ῑc für ιησοῦς; Χ̄c für χριστός; η̄a für ηπεγμα u. a. m.
He	Υ Υ	y [i, y]	
Phi	Φ Φ	ph [p+h]	
Chi	Χ Χ	kh [k+h]	
Epsi	Ψ Ψ	ps	
O	Ϣ ϖ	ō	
Schāi	Ϣ ϖ	š [sch]	
Fāi	Ϥ Ϥ	f	
Chāi	Ϥ Ϥ	b [ch]	
Hori	Ϥ Ϥ	h	
Dschandscha	Ȥ Ȥ	dž [dsch]	
Schima	Ϭ Ϭ	č [g, tsch]	
Di	Ϥ Ϥ	ti	

Figure 3. The Coptic alphabet, from the Reichsdruckerei 1924. The three forms of the *jinkim* are shown, as is the sentence divider.

TABLE 22.10: *The Sahidic Coptic Alphabet*

<i>Letter</i>	<i>Transcription</i>	<i>Phonetic Value</i>	<i>Name^a</i>	<i>Greek/Demotic Source</i>
א	a	[a]	alpha	A
ב	v	[v]	vēta	B
ג	k	[k]	kamma	Γ
ד	t	[t]	talta	Δ
ε	e	[e]	ei	E
ז	s	[s]	sata	Z
ה	ē	[e:]	hata	H
Theta	th	[th]	thita	Θ
ἰ	i	[i]	iōta	I
κ	k	[k]	kappa	K
λ	l	[l]	lauta/lole	Λ
μ	m	[m]	mē/me/mi	M
ν	n	[n]	ne	N
ξ	ks	[ks]	ksi	Ξ
ο	o	[o]	ou	O
π	p	[p]	pi	Π
ρ	r	[r]	rō	P
ϲ	s	[s]	sēmma	Σ
τ	t	[t]	tau	T
γ	u	[u]	he/ue	Υ
ϕ	ph	[ph]	phi	Φ
χ	kh	[kh]	khi	X
Ψ	ps	[ps]	psi	Ψ
ω	ō	[o:]	ō	ω
ϙ	š	[ʃ]	šai	ϙ
ϙ	f	[f]	fai	ϙ
ϙ	h	[h]	hori	ϙ
ϙ	d	[dʒ]	dandia	ϙ
ϙ	q	[q]	qima	ϙ
ϙ	ti	[ti]	ti	ϙ

a. Examples collected in Crum 1939, and cf. Vergote 1973, vol. 1a: 7, citing Worrell 1942; and Kasser 1991.

Figure 4. The Coptic alphabet and names from Ritner 1996.

Let.	Num.		Names	
1	1	Αα	αλφα	alpha
2	2	Ββ	βητα, βιδα	bêta, vida
3	3	Γγ	γαμма	gamma

Figure 5. The Coptic alphabet. The first column indicates the letter order (for example, PHI is the twenty-first letter of the alphabet) as stated in Crum. The second column gives the numeric value of the letters. Transliterated character names taken from Coptic dialects as given in Crum 2000 are used for the Coptic letters. Note especially that Crum distinguishes AKHMIMIC KHEI, KHEI, and HORI in different entries in his dictionary.

Figure 8. Sample text from an edition of the Gospel of Thomas showing use of *jinkim*, diaeresis, apostrophe (drawn as a grave-like stroke), and middle dot.

5. *Accentuation.* L'écriture copte emploie surtout l'accent grave (ou un point) et des traits horizontaux suscrits au-dessus de certaines lettres; c'est pour indiquer qu'une voyelle brève ou auxiliaire *e*, correspondant à notre *e* accentué ou atone, est sous-entendue par l'écriture.

Dans ce cas, le bohaïrique emploie un accent grave ` (ou un point), au-dessus de la première consonne des mots : **አክል** (ou **አካል**) pour **መክል** *"mkah*.

Toutefois, dans le corps du mot, le bohaïrique écrit la voyelle brève *e*.

Tous les autres dialectes remplacent l'accent ` ou ' par un trait horizontal — tracé au-dessus de la première consonne : **ሮብ** pour **የኖበ** *"rnobe*.

Dans le corps du mot, le saïdique indique aussi l'*e* accentué ou atone par le même trait entre les deux consonnes et au-dessus d'elles : **ሸሙ** pour *hemme*; **ርወጥ** pour *sot'm*; **ወኅ** pour *ən'h*; **ጠይቻሚ** pour *epekr'mr'm*.

Les règles d'accentuation sont souvent hors d'usage, bon nombre de manuscrits n'étant pas accentués.

6. Le trait horizontal suscrit est encore employé :

1° Pour indiquer que certains mots très fréquents, coptes ou grecs, sont écrits en abrégé :

፳	፳	pour ዶስታ «Dieu».	፳	pour ዶስታ «le Seigneur».
፳	፳	pour ዶስታ «Dieu».	፳	pour ክያዊ «Seigneur».
፳	፳	pour ክያዊ «Seigneur».	፳	pour ክያዊ «Seigneur».
፳	፳	pour ክያዊ «Seigneur».	፳	pour ክያዊ «Seigneur».
፳	፳	pour ክያዊ «Seigneur».	፳	pour ክያዊ «Seigneur».

Figure 9. Text from Fossey 1948 describing the use of the *jinkim* and the mark of abbreviation.

Für häufige nomina sacra werden Kurzschreibungen (Zusammenziehungen) verwendet, die durch einen waagrechten Strich darüber als solche gekennzeichnet sind. Die gebräuchlichsten sind: **ΔΔΔ = ΔΔΥΕΙΔ**, **ΙΙΙ = ΙΗCOΥC**, **ΙΙΙ = ΙCPΔΗΛ**, **ΘΙΙΗΗ = ΘΙΕΡΟΥCΑΛΗΗ**, **ΠΠΠ = ΠΝΕΥΜΑ**, **CΡOC = CTΛΥΡΟC**, **CTWΡ = CΩΤΗΡ**.
ΧC = XPICTOC, **ΧC = XOEIC**.

Figure 10. Text from Till 1966 showing abbreviations, including the use of COPTIC SMALL LETTER RO WITH STROKE

wöhnlich sind sie durch einen waagrechten Strich darüber als Zahlen gekennzeichnet. Die Zahlwerte sind:
፳ = 1, ፲ = 2, ፳ = 3, ፴ = 4, ፵ = 5, ፶ = 6, ፷ = 7,
፸ = 8, ፹ = 9, ፺ = 10, ፻ = 20, ፼ = 30, ፻ = 40, ፻ = 50,
፻ = 60, ፻ = 70, ፻ = 80, ፻ = 90, ፻ = 100, ፻ = 200,
፻ = 300, ፻ = 400, ፻ = 500, ፻ = 600, ፻ = 700,
፻ = 800, ፻ = 900, ፻ = 1000 usw.; z. B. ፻/፻፻፻ = 1888.

Die Brüche, deren Zähler mit ganz wenigen Ausnahmen stets 1 ist, werden dadurch bezeichnet, daß der Zahl für den Nenner ein schräger Strich rechts oben beigefügt wird: **፻' = $\frac{1}{3}$** . Ausnahmen: **፻ = $\frac{1}{2}$** .

Figure 11. Coptic numerals from Till 1966.

ꝑ = 1	ꝑ = 20	ꝑ = 300
ꝑ = 2	ꝑ = 30	ꝑ = 400
ꝑ = 3	ꝑ = 40	ꝑ = 500
ꝑ = 4	ꝑ = 50	ꝑ = 600
ꝑ = 5	ꝑ = 60	ꝑ = 700
ꝑ = 6	ꝑ = 70	ꝑ = 800
ꝑ = 7	ꝑ = 80	ꝑ = 900
ꝑ = 8	ꝑ = 90	ꝑ = 1.000
ꝑ = 9	ꝑ = 100	ꝑ = 2.000
ꝑ = 10	ꝑ = 200	ꝑ = 10.000

7. *Dans la grammaire* : on écrit l'accent aigu ' pour indiquer la voyelle formative qui porte l'accent tonique : ꝑѡѡ, ꝑѧѡ, ꝑѡѡ.

Dans les grammaires et les vocabulaires, on use aussi de *traits d'union* dans les mots composés et pour séparer préfixes et suffixes de la racine. Le mot copte à l'état construit, c'est-à-dire uni à son complément, est suivi d'un trait d'union, ꝑ҃-, qui le réunira à son complément éventuel; le mot à l'état pronominal, c'est-à-dire accompagné d'un pronom, est suivi de deux traits obliques, ꝑࡀ=, qui annoncent un pronom éventuel.

8. Certains manuscrits coptes sont ponctués. La ponctuation des textes imprimés est généralement ajoutée par l'éditeur.

Consulter : A. MALLON, *Grammaire copte*, Beyrouth, 1907.

Translation

→ (1) (Christ-monogram) I have received, I 'Osi'an, from you, Ose, (2) twenty-four solidi of gold, (3) ma(king) 24 so(lidi) of go(ld) only. And this, (4) G(od) willing, [- - -] when I 'come down'⁸⁹⁸ (5) I shall return to you [- - -] (6) [- - -] And [it is satisfactory to me] (7) [as] above. (sign)

→ (8) (Sign of the cross) Wri(tten) by me, Sansno(s), on the '5th' of the mo(nth) Phaophi, 4th ind(iction).

Figure 16. Sample from Eide et al. 1998. Acknowledgement of debt in Greek text from Gebelen. The editor informed that the original text gives the CHI RHO symbol in line 1 of the Greek text; it was set with a space left because he did not believe that two letters χρ was adequate, though the encoded CHI RHO in the Unicode Standard would do for this (though not for the Coptic sample above). The DAGGER is used again in line 8 to indicate the Sign of the Cross.

(earlier apparently they beat a stick; then) [...
 GIŠp]a-a-hi-ša UL wal̄[zi ...] nu-ššan 1 GIŠpa-ah- ←
 hi-ša x [... (x x-anzi)] / [maḥhan=ma=as] (var.
